AQUALAB PAWKIT

Grab and go

Designed for government inspectors and third-party auditors, the lightweight Pawkit is perfect for water activity spot checks on the go.

How it works

To make a measurement, flip back the sensor cover and fit the Pawkit over a standard AQUALAB sample cup. Push the button for a water activity reading in 5 minutes.

With a limited \pm 0.02 a_w accuracy, the Pawkit should only be used to verify readings or where a higher accuracy reading is not critical.

Portable water activity

- Pocket-sized-3.5 x 4 inches
- Battery operated
